PROFILE

Passionate Computer Science student specializing in Full-Stack Web Development and Blockchain Development. Skilled in React.js, Node.js, and Solidity with hands-on experience building real-time and decentralized applications.

PROJECTS

MetaDrive – Decentralized File Storing and Sharing DApp
Built a full-stack decentralized application enabling secure, drive-like file storage and sharing using blockchain technology. Integrated IPFS (via Pinata) for distributed file storage, and smart contracts in Solidity for access control and ownership management. Developed the frontend in React.js with Ethers.js for seamless MetaMask interaction.

DevShare – Real-time Code Sharing Platform with Compiler
Developed a real-time code-sharing platform with a built-in compiler. Utilized React.js, Node.js (Express), Socket.io, and Monaco Editor to enable seamless live collaboration. Implemented WebSockets for real-time updates and efficient code execution.
