EDUCATION

Symbiosis Institute Of Technology

Bachelor of Engineering in Computer Science and Engineering

Nagpur, Maharashtra, India

2023 – 2027

EXPERIENCE

Full Stack Developer Intern

AVABODH Foundation

Jan 2026 – Apr 2026

India

- Developing complete MERN stack web applications (MongoDB, ExpressJS, ReactJS, NodeJS).
- Building responsive user interface (UI) components, linking them to backend services via Restful APIs to provide dynamic access to data.
- Learning and applying industry-standard principles for code quality, version control, and deployment.

PROJECTS

Igris.AI – AI SaaS Platform | *React.js, Vite, Node.js, Express.js, Neon, Clerk, Cloudinary*

2026

- Engineered a full-stack AI SaaS platform delivering multiple AI-driven utilities through a scalable and modular web architecture
- Seamlessly Integrated Clerk Authentication for secure user sign-in, session management, and protected access across all platform services
- Built scalable backend services using Express.js to manage AI processing workflows, API routing, and third-party integrations
- Integrated Cloudinary and Multer for efficient file upload handling, cloud-based media storage, and optimized asset delivery

MetaDrive – Decentralized File Sharing DApp | *React.js, Solidity, Ethers.js, IPFS (Pinata)*

2025

- Enhanced a Decentralized File Storage and Sharing Platform Using Blockchain Technology For Access Control
- Implemented Smart Contracts In Order To Supervise All File Controls And File Ownership In A Secure Manner
- Completed Integration of IPFS Using Pinata In Order To Store Files In Distributed and Untampered with Locations.

TECHNICAL SKILLS

Front-end: React, Tailwind, HTML/CSS

Back-end: Node.js, Express.js, RestAPI

Languages: JavaScript, C

Databases: SQL, PostgreSQL

Developer Tools: Git, GitHub, VS Code

Deployment: Vercel, Netlify

CERTIFICATIONS

Udemy : The Complete Full-Stack Web Development

Infosys Springboard : Database and SQL Course

Coursera : Frontend for Java Full Stack Development
